Driver Side Wall Liner Installation

B, C

- 1:** Install Item 13, Front Driver Side Panel.
 - Align notch and edge of panel with the feature on the vehicle driver side front then align opposite side of panel edge with the contour features.
 - Install hardware (B, C), in the holes provided, on the bottom of the panel first, working your way up the panel to the top.
- 2:** Install Item 11, Rear Driver Side Panel.
 - Align wheel well edge of the panel with the feature on the vehicle, position the contour of the panel to the vehicle wall.
 - Install hardware (B, C), in the holes provided, on the bottom of the panel first, working your way up the panel to the top.

Installation completed

Back Door Wall Liner Installation

3: Install Item 9 and 10, Upper door panels,

- Install hardware (A) in the center top hole on each panel and on the corresponding hole at the top center of each door.
- Align the Upper panels with the door contours.
- Install hardware (B, C), in the holes provided, on the bottom of the panel first, working your way up the panel to the top.

4: Remove the door handle Bezel prior to installing the bottom passenger side panel. The bezel must be pulled off of the handle unclipping the edge of the Bezel all around the handle frame.

- Install Item 7 and 8, Lower door panels, with hardware (A) all around the panels in the holes provided on the panel as well as on the doors.
- Align the Lower panels with the door contours, install hardware (A).
- Reinstall the handle Bezel by aligning it and pushing it back into place.

DOOR PANEL

FRONT

BACK

B, C

5: Install Item 5, Rear Passenger Side Panel.

- Align wheel well edge of the panel with the feature on the vehicle; position the contour of the panel to the vehicle wall.
- Install hardware (B, C), in the holes provided, on the bottom of the panel first, working your way up the panel to the top.

6: Install Item 6, Sliding Door Panel.

- Note: Sliding door must be closed to install panel;
- Insert panel into the sliding door sill cavity, align holes at the bottom half of the panel to the one on the door and insert Retainer (A) in all of the holes. Install hardware (B, C) in the holes provided on the top part of the panel.

Ceiling Liner Installation

Z: Install Item 1, Ceiling Panel.

- Align Ceiling panel with the feature on the vehicle in the front, insert the front of the panel between the headliner and the roof, and insert the back tabs of the panel into the slots in the back top section of the vehicle.
- Align the outside holes at the center of the panel with the threaded inserts in the ceiling and install hardware (D) on each side; this will align the panel with the ceiling.
- Push the panel against the ceiling and install hardware (B, C), in the holes provided starting from the front working your way towards the back.

PASSENGER
SIDE PANEL

ITEM 12
BACK CORNER
DRIVERS SIDE

- 8:** Install Item 12 AND 14, Back Corner Panels.
- Align Corner panels with the wall features on the vehicle in each back corner as well as with the floor.
 - Push the panel against the corner wall and install hardware (B, C), in the holes provided starting from the bottom working your way towards the top.

Ceiling Sills Installation

- 9:** Install Item 2 AND 3, Ceiling Sills.
- Align the Sill on its appropriate side with the wall and the ceiling. The Sill with the large hole is the Drivers side Sill which aligns with the light in the vehicle.
 - The side of the Sill with the most holes goes against the wall and the side with the four holes goes against the ceiling. These four holes align with the roof cross members.
 - Push the Sill against the wall and the ceiling equally and install hardware (B, C), in the holes provided starting with the holes on the wall side of the Sill, install all of them first then install the hardware (B,C) on the ceiling side of the Sill.
